

A

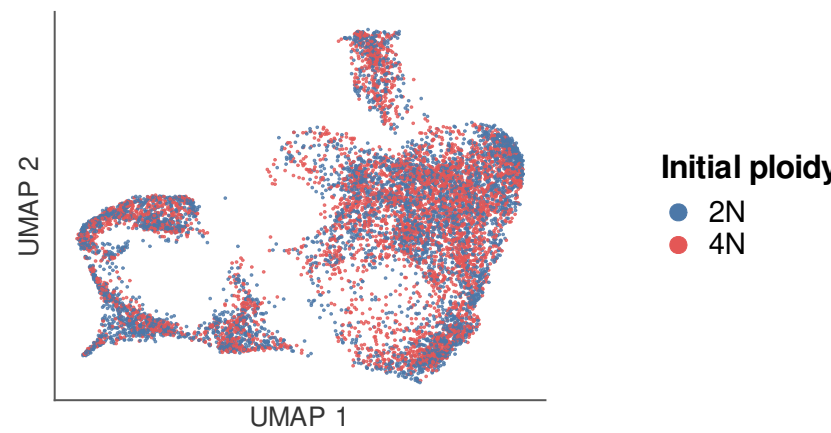

UMAP by cluster

Tumor cells; n = 9,832

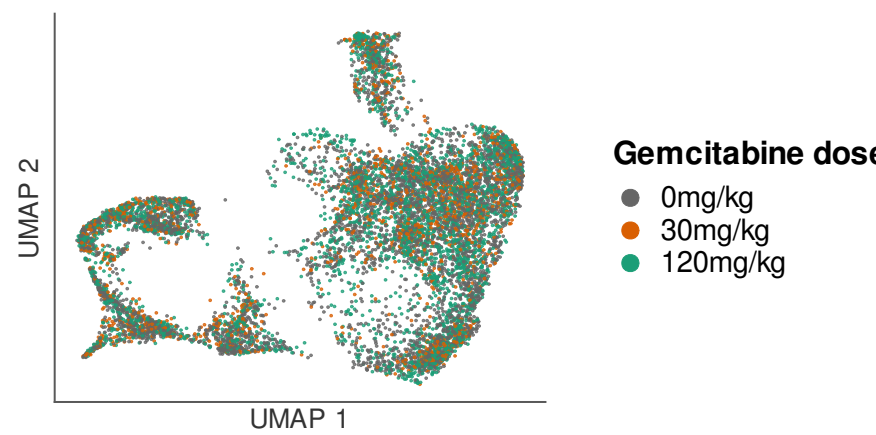

B

UMAP by initial tumor ploidy

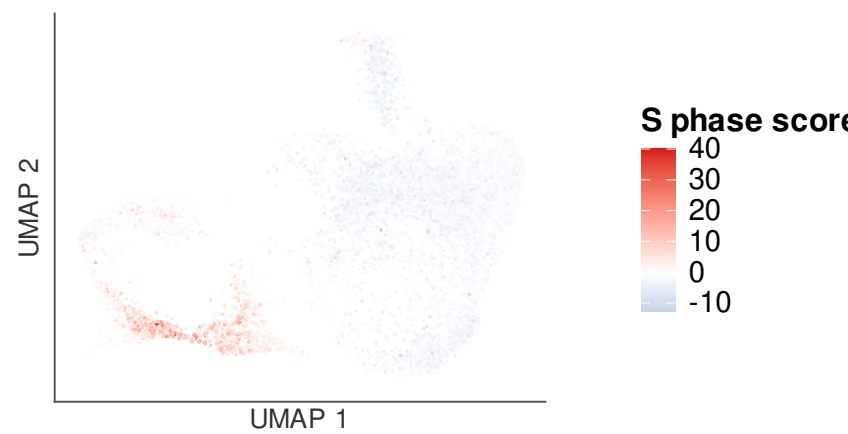

C

UMAP by Gemcitabine dose

D

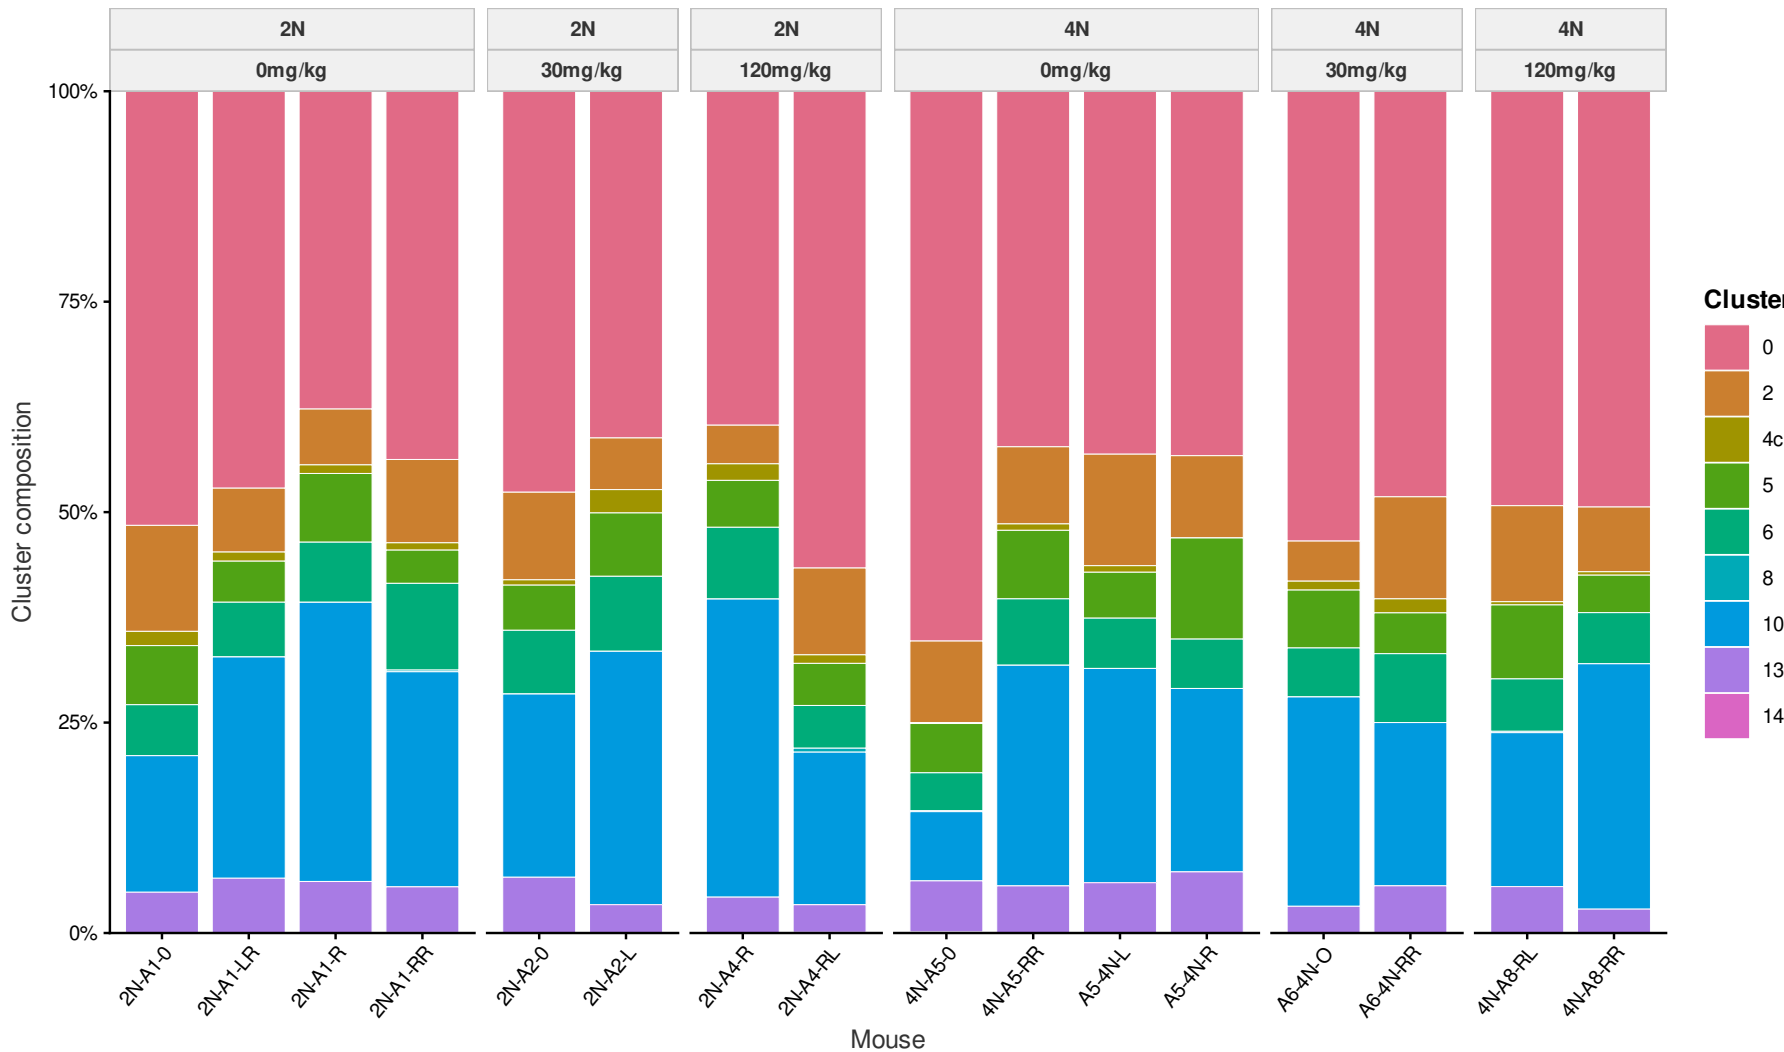

UMAP by S phase score

F

Cluster composition of each mouse

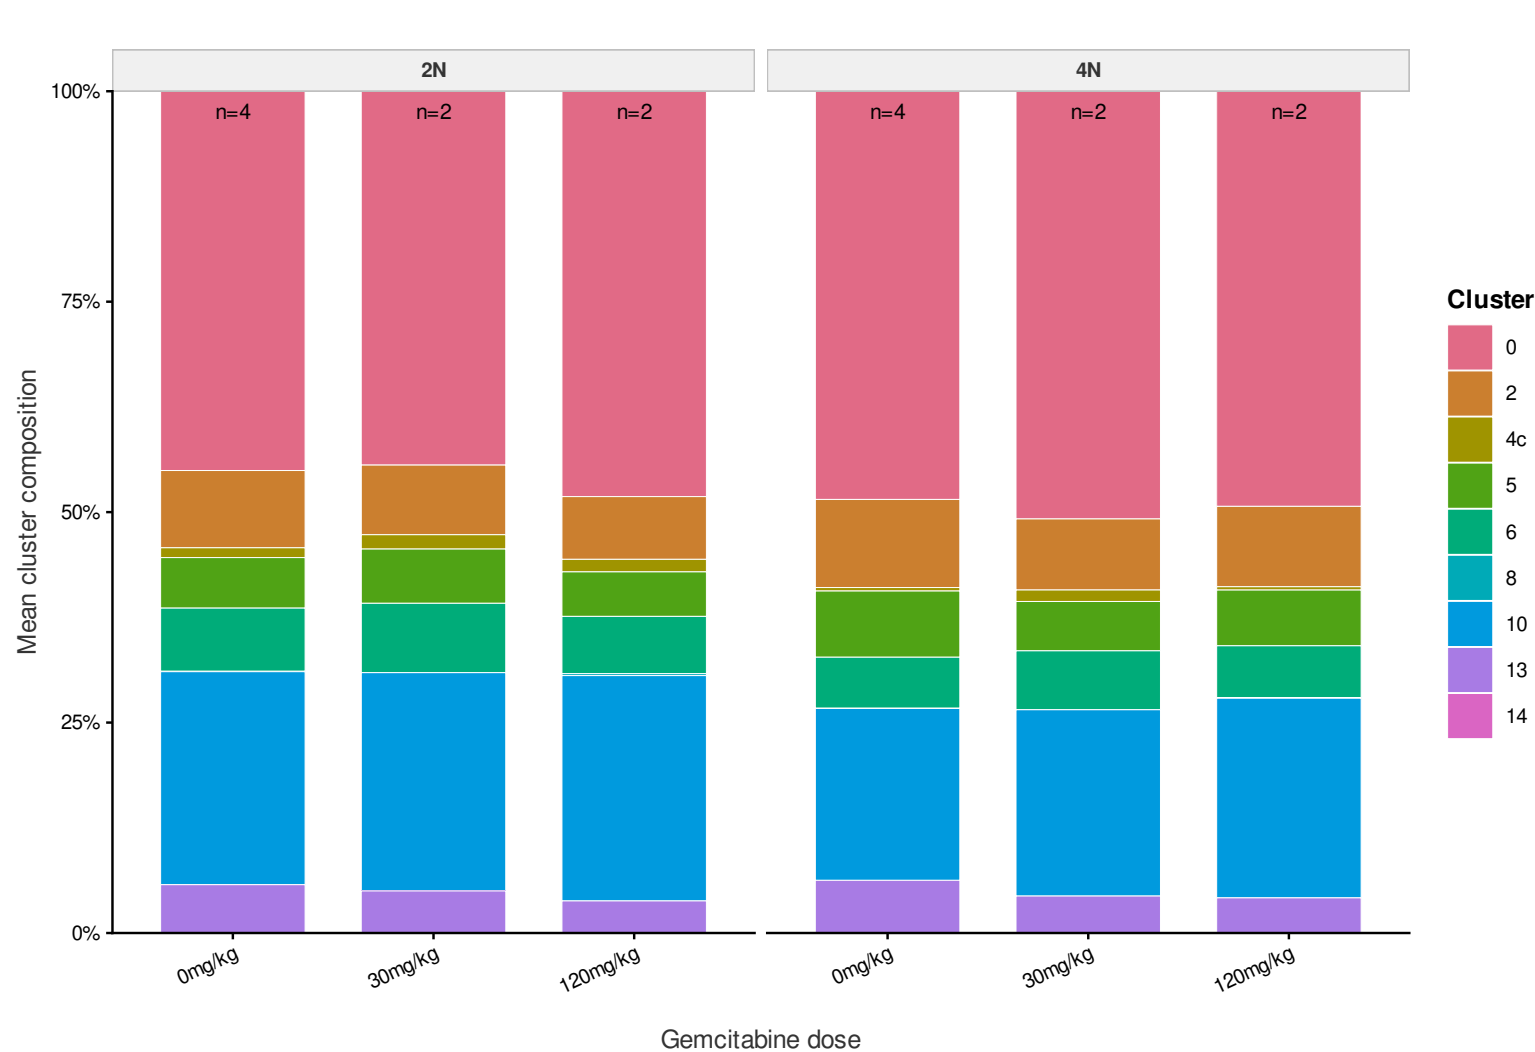

Each mouse sums to 100%

G

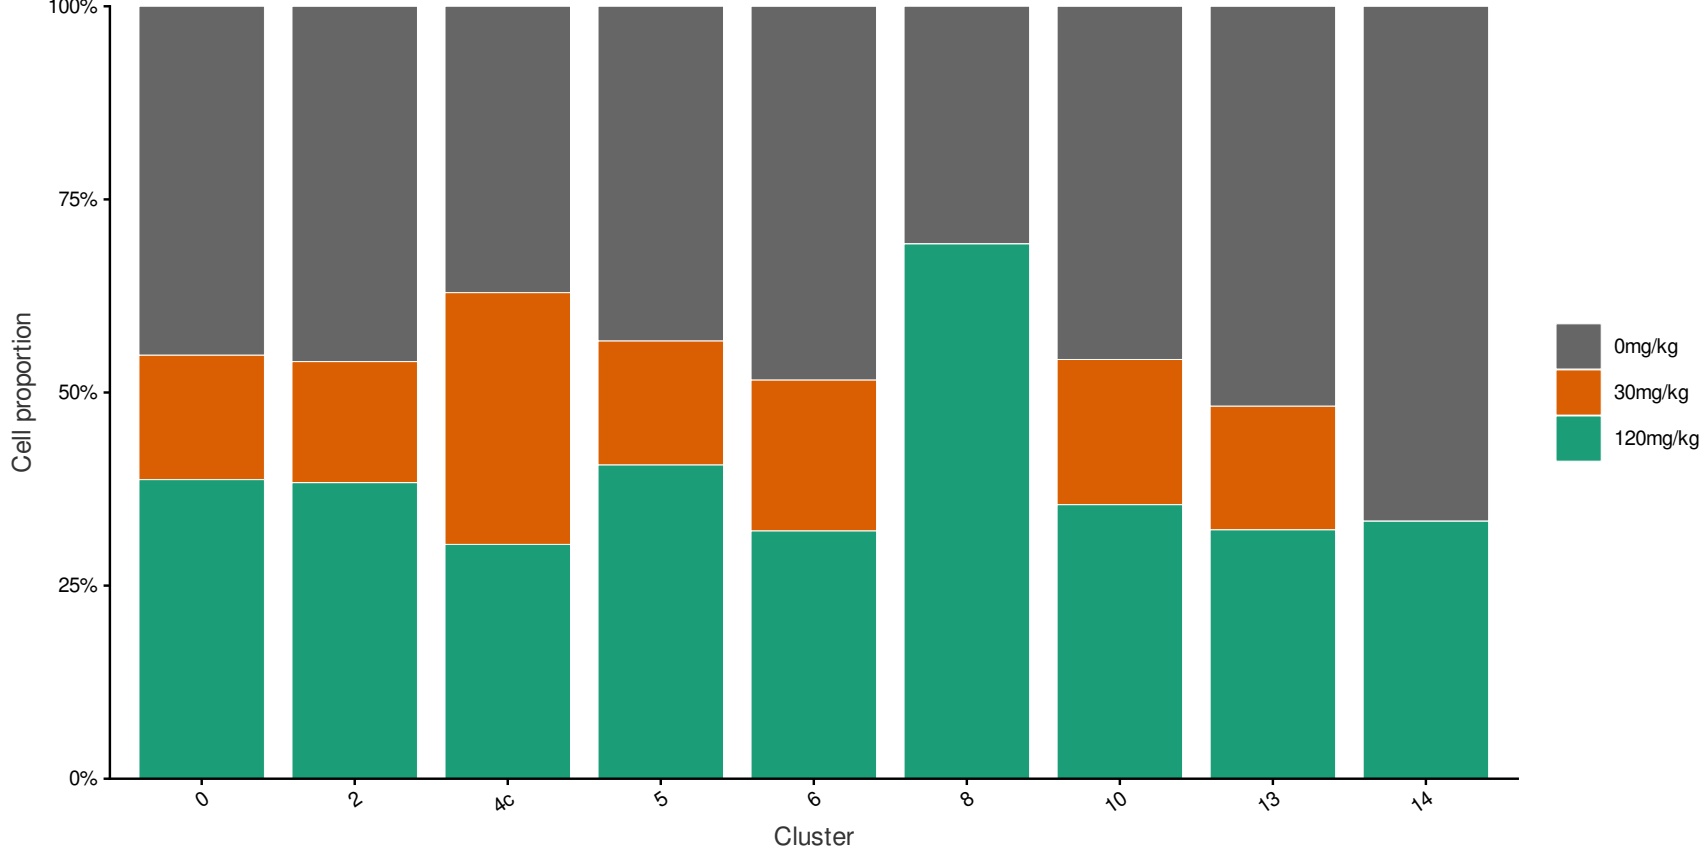

Mouse-weighted composition by initial ploidy and dose

Cluster proportions are calculated per mouse, then averaged with equal mouse weights

H

Gemcitabine dose composition by cluster

I

Initial ploidy composition by cluster
