

A**UMAP by mouse of origin**

16 mice; shared injected-origin color code

**B****Within-mouse cluster composition**

Every mouse sums to 100%; one biological sample per bar.

This panel is descriptive and has no inferential stars

**C****Equal-mouse composition by initial ploidy and dose**

Within-mouse proportions are averaged with equal mouse weights.

Stars mark dose enrichment within ploidy at BH FDR <= 0.05
