

**A****B**

Low-ploidy-selective enrichment  
(ordered by chemotherapy-agent significance)

**C**

High-ploidy-selective enrichment  
(same row and drug-class order)

Stars mark nominal enrichment  $p \leq 0.05$ . Exact  $p=0$  entries were plotted at the permutation floor (smallest positive  $p = 0.00333333$ ) to avoid infinite  $-\log_{10}$  values.
